## Introduction

The *Guide to Canadian Photographic Archives* is a catalogue describing the holdings and collections of photographic archives in over 110 Canadian institutions. These institutions include repositories of federal, provincial and municipal governments, universities, historical societies, libraries, museums, research centres, private companies and photography studios.

With the aid of the *Guide to Canadian Photographic Archives* the researcher, confronted with an enormous mass of photographic records, can rapidly ascertain the photographic resources available in Canada. He can then identify and choose the group of photographic documents that will increase his knowledge in a given field of research.

With the ever-growing use of photographic records by publishers, teaching establishments, the media and the general public, such finding aids are necessary. Two prominent researchers have stated that:

No knowledgeable person doubts that there are many significant and touching images buried in our depositories everywhere - unknown, uncatalogued, unavailable for use. They should be catalogued, for local, statewide and regional listings of our collections are badly required. A National Union List of Photographs must ultimately take its rightful place in research libraries as a valuable and much needed bibliographical tool.\*

Convinced of the merits of this view, the Public Archives of Canada, in collaboration with the provincial archives, have encouraged and supported the preparation of this *Guide*.

The first volume of the preliminary inventory includes approximately 2,800 entries arranged alphabetically by titles of holdings. Of these entries, 1,800 are part of the National Photography Collection of the Public Archives of Canada; 1000 are from other participating repositories. Each of these holdings or collections may contain from one to several hundred thousand photographs. Since equal space is provided for all the entries, the smaller units of photographic records are described in greater detail than the very large ones.

The location of each of the holdings is indicated by all alpha-numerical code, for which there is a key in the appendix. That code is followed by a number which designates one holding in particular. For example, the code 7P-83 stands for the holdings of the photographer William James Topley in the Public Archives of Canada.

Each entry is made up of a title, based on the name of the individual or organization responsible for producing or bringing together the photographs; some biographical and historical information concerning this individual or body; the period covered by these records and the number of black and white or colour photographs; and a description of the main subjects, names of individuals and places photographed, and of the known photographers. Titles of finding aids for individual holdings are also listed to help the researcher. Once the entries have been selected, the researcher may contact the institution concerned to obtain additional information.

In this first volume the descriptions are in French or English, according to the language in which the description was submitted. Two further volumes will be published, depending on how much information is received from institutions, with entries in French or in English. These volumes will constitute a provisional inventory. They will then be expanded, revised and translated to form a permanent inventory.

The *Guide to Canadian Photographic Archives* is the result of a collective effort.

Elizabeth Jong and Brian Carey compiled the subject index; Sharon Kelly-Uno and Christopher Seifried assisted in editing. Joy Williams, Peter Robertson, Joan Schwartz, Lilly Koltun and Andrew Rodger wrote the descriptions of the Public Archives of Canada holdings and collections; and E. Grace Hyam and Victorin Chabot, the editor and assistant editor respectively of the *Union List of Manuscripts in Canadian Repositories*, provided guidance and the benefit of their advice and experience. Public Archives Information Services collaborated in the publishing of this volume.

I would like to thank the Provincial archivists, librarians, curators, historians, photographers, support staff and directors of institutions for their valuable participation.

\*Weinstein, Robert A. and Larry Booth. *Collection, Use and Care of Historical Photographs*. American Association for State and Local History, Nashville, 1977, p. 17.

I wish in particular to acknowledge the contribution of the provincial archivists who agreed, despite their own heavy workloads, to collaborate in the production of this inventory.

This first edition of the preliminary inventory is bound to contain omissions and errors. I would be grateful to receive any comments from researchers that may help to improve subsequent editions.

Alain Clavet,  
Coordinator

## Introduction

Le *Guide des archives photographiques canadiennes* répertorie et décrit les fonds et collections d'archives photographiques conservés dans plus de cent dix institutions canadiennes. Ces institutions sont des dépôts d'archives fédérales, provinciales, municipales et universitaires, des sociétés historiques, des bibliothèques, des musées, des centres de recherche, des compagnies privées et enfin des studios de photographes.

Le *Guide des archives photographiques canadiennes* vise à aider le chercheur, confronté à une quantité énorme de documents photographiques, à connaître rapidement l'ensemble des sources photographiques canadiennes disponibles, et à repérer et choisir le groupe de documents photographiques qui saura lui être utile pour approfondir un sujet de recherche donné.

L'utilisation sans cesse croissante de la documentation photographique par les maisons d'édition et les établissements d'enseignement, par les médias et le public en général, est à l'origine de cet instrument de recherche. D'ailleurs, deux éminents chercheurs n'ont-ils pas affirmé :

Toute personne avisée sait qu'il existe quantité de photographies, importantes et pertinentes, enfouies quelque part dans nos dépôts, inconnues, non cataloguées et donc inutilisables. Il y aurait avantage à les cataloguer puisque des répertoires s'imposent aux niveaux local, provincial et régional. Chaque bibliothèque de recherche devra un jour être dotée d'un catalogue collectif de photographies, outil bibliographique précieux et indispensable\*.

Persuadées du bien-fondé de cette opinion, les Archives publiques du Canada, en collaboration avec les archives provinciales, ont encouragé et soutenu la préparation de ce *Guide*.

Ce premier volume de l'inventaire préliminaire comprend approximativement 2,800 notices classées selon l'ordre alphabétique des titres de fonds. 1 800 proviennent de la Collection nationale de photographies des Archives publiques du Canada et 1000 des autres dépôts participants. Chacun de ces fonds ou collections peut compter d'une à plusieurs centaines de milliers de photographies. Comme un espace identique est prévu pour les notices, les petits groupes de documents photographiques sont décrits de façon plus complète que les groupes quantitativement très importants.

Les dépôts, où ces fonds sont conservés, sont identifiés par des symboles alpha-numériques. Ces symboles, dont une liste se trouve en appendice, sont suivis d'un nombre qui identifie un fonds en particulier. Par exemple, la cote 7P-83 correspond au fonds photographe William James Topley conservé aux Archives publiques du Canada.

La notice comprend un titre correspondant au nom de l'individu ou de l'organisme qui est responsable de la création ou du regroupement des documents photographiques; des renseignements d'ordre biographique et historique; une évaluation de la période couverte par ces documents photographiques ainsi que la quantité en noir et blanc ou couleur; et une description mentionnant les principaux thèmes, les noms des individus et des lieux photographiés, ainsi que les noms des photographes s'ils sont connus. Afin de faciliter la recherche, les titres des instruments de recherche se rapportant à chacun de ces fonds sont également mentionnés. Une fois le fonds repéré, le chercheur n'a plus qu'à communiquer avec l'institution concernée pour obtenir de plus amples renseignements.

Dans ce premier volume, les descriptions ont été publiées en français ou en anglais selon la langue utilisée pour la description. Un ou deux autres volumes paraîtront, selon l'importance de la participation des institutions, avec des notices en français ou en anglais. Ces volumes constitueront un inventaire provisoire. Ils seront ensuite augmentés, révisés et traduits pour constituer un inventaire permanent et à grand tirage.

La réalisation du *Guide des archives photographiques canadiennes* résulte d'un travail d'équipe.

Elizabeth Jong et Brian Carey ont travaillé à la compilation de l'index des sujets; Sharon Kelly-Uno et Christopher Seifried ont standardisé les notices. Joy Williams, Peter Robertson, Joan Schwartz, Lilly Koltun et Andrew Rodger ont décrit les fonds et les collections conservés aux Archives publiques du Canada. E. Grace Hyam et Victorin Chabot, respectivement rédacteur et rédacteur adjoint du *Catalogue collectif des manuscrits conservés dans les dépôts d'archives canadiens*, ont su nous guider par leurs conseils et leur expérience. Le concours des Services d'information des Archives publiques a facilité la publication de ce volume.

\* Weinstein, Robert A. et Larry Booth, *Collection, Use and Care of Historical Photographs*, American Association for State and Local History, Nashville, 1977, p. 17.

Nous tenons à remercier tous les archivistes provinciaux, les bibliothécaires, les conservateurs, les historiens, les photographes et les responsables des institutions qui ont participé à cet effort collectif.

Cette première édition de l'inventaire préliminaire ne peut se faire sans omissions et sans erreurs. Nous serions reconnaissants aux chercheurs de nous communiquer tout commentaire susceptible d'améliorer la prochaine édition.

Alain Clavet  
Coordonnateur

## EXPLANATION OF ENTRIES

Researchers are asked to read the following explanations before using this guide.

### Language

The holdings and collections of photographic archives in this provisional edition are described in French or in English. A revised and corrected bilingual edition will be published at a later date.

### Location of Holdings and Collections

The repositories which participated in the production of this guide were assigned alpha-numerical codes corresponding to numbers used in the *Union List of Manuscripts* (ULM) (7P for Public Archives of Canada, 32P for Mount Allison University Archives). New codes were assigned to repositories not listed in the ULM (327P for Notman Photographic Archives and 339P for Saskatoon Public Library). The code appears after the title of the unit. The number preceding the hyphen corresponds to one of the archival repositories listed in the "Key to Location of Photographs" on the last page of the volume. All entries received from the same institution are numbered consecutively following the hyphen.

### Titles of Units

Units are listed under the names of the persons, corporate bodies and government agencies which received, produced and assembled the photographic records.

### Dates of Birth and Death

Whenever possible the dates of birth and death of the individual whose photographs are described in this guide are given.

### Order of Entries

The entries are arranged in alphabetical order, word by word.

e.g. Baker, D.H.  
Baker, Raymond F.  
Baker, Russell  
Bouchier (famille)  
Bourdon, Louis-Honoré

Names beginning with the letters "Mac" and "Mc" are arranged in strict alphabetical order.

e.g. MacDonald, James Edward Hervey  
MacPherson, Robert G.  
Manitoba, Museum of Man  
McDonald, Percy

Titles of holdings beginning with a numeral appear after those in alphabetic characters.

e.g. Vanier Institute of the Family  
Van Zeggeren, Frederic  
153 Mile House Store

### Residence and Principal Occupation

Whenever possible the place of residence and the principal occupation of individuals have also been given. They are listed next to the dates of birth and death, following the title.

### Type, Quantity and Inclusive Dates of Records

This section indicates whether the holding or collection is made up of original photographic material exclusively or of copies exclusively. Nothing is indicated for units containing both types of records. The number of black and white and of colour photographs is given, if this information is known. The dates listed refer to the production of the photographic records, and not to the subjects of the photographs.

**Description of Photographic Records**

This paragraph contains a concise description of the main divisions and contents of the unit. Whenever possible the principal subjects, prominent events and well-known persons appearing in the photographs are named.

**Restricted Access**

Some holdings and collections may not be consulted and/or reproduced without the permission of the owner. Researchers are therefore advised to inquire about terms of access to archives in which they are interested before visiting a repository.

**Catalogue-by-repositories**

An alphabetic listing of all holdings and collections is given for each participating repository at the end of the *Guide to Canadian Photographic Archives*. These listings, arranged by repository code, help the researcher to identify rapidly the records described for a given repository.

**Key to Location of Photographs**

The last page of this volume contains a key to the alpha-numerical codes used for the repositories. The name and full address of each repository are given in the "List of Participating Repositories".

## EXPLICATION DES NOTICES

Les chercheurs sont priés de lire les explications suivantes avant de se servir de ce guide.

### La langue

Les fonds et les collections d'archives photographiques de cette édition provisoire sont décrits en français ou en anglais. Une édition bilingue revue et corrigée sera publiée ultérieurement.

### Localisation des fonds et collections

Les dépôts d'archives participant à l'élaboration de ce guide ont reçu un symbole alpha-numérique correspondant à celui du *Catalogue collectif des manuscrits* (C.C.M.) (7P pour les Archives publiques du Canada, 32P pour le Mount Allison University Archives). Si le dépôt n'a pas été répertorié dans le C.C.M. un nouveau numéro lui a été assigné. (327P pour les Archives photographiques Notman et 339P pour le Saskatoon Public Library). Ce symbole numérique paraît après le titre du fonds. Le chiffre qui précède le tiret, correspond à l'un des dépôts d'archives énumérés dans la liste numérique des dépôts qui se trouve à la dernière page du volume. Tous les fonds d'une même institution sont numérotés consécutivement et ce numéro suit le tiret.

### Titres des fonds et collections

Les titres des fonds et collections sont désignés par le nom des personnes, physiques ou morales, et des organismes gouvernementaux qui ont reçu, créé et accumulé les documents photographiques.

### Dates de naissance et de décès

Dans la mesure du possible, on mentionne les dates de naissance et de décès des personnes dont les photos sont décrites dans ce guide.

### Classement des notices

Les titres des notices sont classés en ordre alphabétique, mot par mot.

Exemples :

Baker, D.H.  
Baker, Raymond F.  
Baker, Russell  
Bourchier (famille)  
Bourdon, Louis-Honoré

Les noms commençant par les lettres « Mac » et « Mc » sont classés en ordre alphabétique strict.

Exemples :

MacDonald, James Edward Hervey  
MacPherson, Robert G.  
Manitoba, Museum of Man  
McDonald, Percy

Les titres de fonds commençant par des chiffres arabes apparaissent à la fin de l'ordre alphabétique.

Exemples :

Vanier Institute of the Family  
Van Zeggeren, Frederic  
153 Mile House Store

### Domicile et occupation principale.

Le lieu de résidence et l'occupation principale des personnes sont également mentionnés lorsqu'ils sont connus. Ces renseignements apparaissent à la suite des dates de naissance et de décès, après le titre.

### **Catégories, quantité et dates extrêmes des documents.**

Cette section indique si le fonds ou la collection est composé uniquement de documents photographiques originaux ou de copies. S'il y a des originaux et des copies dans le même fonds ou la même collection, rien n'est indiqué. La quantité de documents photographiques en noir et blanc ou en couleur est mentionnée si elle est connue, et les dates sont celles de la création des documents photographiques et non celles des sujets qu'ils représentent.

### **Description des documents photographiques**

Ce paragraphe décrit brièvement les principales divisions ainsi que le contenu du fonds ou de la collection. Dans la mesure du possible, les sujets principaux, les événements marquants et les personnes éminentes apparaissant sur les photos sont mentionnées.

### **Restriction**

Certains fonds et collections ne peuvent être consultés et/ou reproduits sans la permission de leur propriétaire. Avant de se rendre à un dépôt d'archives, les chercheurs ont donc avantage à s'enquérir des conditions de consultation des fonds et collections qui les intéressent.

### **Catalogue par dépôt**

Afin de connaître rapidement les fonds décrits provenant d'un dépôt en particulier, on trouvera à la fin du *Guide des archives photographiques canadiennes*, selon l'ordre numérique des dépôts participants, la liste alphabétique des titres de tous leurs fonds et collections.

### **Liste numérique des dépôts**

Les chercheurs trouveront à la dernière page de ce volume une liste des symboles alpha-numériques des dépôts et des noms correspondants. Le nom et l'adresse exacte de chaque dépôt sont indiqués dans la liste des dépôts participants.

**List of Abbreviations – Liste des abréviations**
